

The Chain Ladder

Materials

The Chain Ladder is made of acid-resistant steel chains with footsteps made of acid-resistant steel with a UV-resistant yellow (RAL 1016) powder coating. Premium 3M reflexes are attached to each step. The low handle (optional) is made of acid-resistant stainless steel with a UV-resistant yellow (RAL 1016) powder coating. 2 pieces of 3M premium yellow reflexes are attached to each handle. The Chain Ladder is bought in meter lengths starting at 2 meters, up to 6 meter. The Weight (optional) is made of fiber-reinforced concrete, with stainless steel attachments. Attach the stainless steel attachments of The Weight with shackles at the end of The Chain Ladder.
