The Rescue Raft

Materials

The Rescue Raft is made of 2 composite pontoons, interconnected by a 20 mm MDF Board with 12 grabbing handles. The Paddle is made of an aluminum tube with red composite paddle blades on both ends. A stainless steel wire connects The Paddle to The Rescue Raft. 2 handles made of composite are placed on each pontoon for moving and handling The Rescue Raft. An orange Vinyl line for the distressed to grab is placed on both Pontoons. Premium 3M reflexes are attached to The Rescue Raft. The Rescue Raft Stand is made of 2 aluminium tubes (Ø 6 cm) with an UV-resistant black powder coating, 2 post bases made of stainless steel and 2 boards of 20mm MDF. The Rescue Raft Stand is bought separately. The Light Unit can be attached to the top of the stand (sold separately)

Weight and dimensions

The Rescue Raft: 215 x 28 x 105 cm, 30 kg

The Rescue Raft Stand: 215 x 14 x 60 cm, 10,3 kg

Lifespan and Maintenance

The lifespan of The Rescue Raft depends on where it is placed and how exposed it is to the elements. To increase lifespan, we recommend reviewing The Rescue Raft every year. If necessary, it can be washed off with water and mild detergent. When The Rescue Raft is consumed, it shall be sorted as combustible waste for energy extraction.
